CS 2800 – Web Development I
Fall 2015
Assignment 11 –Presentation Summary

Due: November 10, 11:59 pm

Turn in: upload the html document described below – do NOT zip the file!

Summarize the key points from the presentations given November 2-6.   Follow these guidelines:

- Two to three paragraphs for each chapter presentation that thoroughly explain the topic. While lists may be used within the document, the text should be written in paragraph form.

- Include the assignment number and your name in the heading section of the page.

- Use headings (h1, h2, h3) for semantic meaning, not for styling! Explanations can be found at the following sites:

  http://joyofcode.com/how-to-use-heading-tags-in-a-web-page/ (Be sure to scroll down to look at the "old way" and "new way" examples)

  http://accessibility.psu.edu/headingshtml/ (specifically item 2)

- Style your work in a separate .css file.
  - Include a rule to right-align the heading section with your name and assignment number
  - Include a rule for each heading type used (h1, h2, etc.) to achieve an attractive look
  - Include a rule to add extra space between chapters
  - Other css is not required, but may be used if you feel it will aid readability

Grading:

- html is well-structured, using valid html5 syntax (5 points)

- Each topic has been summarized in the student's own words; the summary includes all key topics (brief description of each) presented in class (5 points per chapter)
