CS2800 – Fall 2015
Semester Project

Part 2 Grading Rubric

	Possible Points
Folder hierarchy (10 points possible):	
Main folder is named *yourLastName_website* (or similar as specified on the requirements document)	4
Includes images folder and css folder	6
Home page html:	
Follows the wireframe and description from Part 1, including header, navigation bar, and footer.	10
Includes all required parts of an HTML5 document	5
The head section includes title, favicon, and meta data with description and keywords	5
Links to all other pages are correctly implemented	5
Does NOT include styling, with the exception of image widths	5
Other html:	
All other pages described in Part 1 are implemented with the same head section and the same header, navigation bar, and footer as on the home page. No other content is necessary.	15
Links to all pages from all pages are correctly implemented, including the logo-as-link back to the home page.	10
CSS:	
Normalize.css is in the css folder; a link to this stylesheet is included in the head section of all web pages	5
css for the home page has been completed to achieve an attractive design that meets all appropriate usability guidelines	10
Media queries are appropriately used to achieve a correct mobile version and a correct desktop version (both versions align with the wireframes from part 1)	10
Separate files for various portions of the css are used, as described in the requirements documents	5
Validation for HTML5 and CSS3 does not turn up any errors	5
